Hackathon 2025
For the health and nutrition Chat Bot

Agenda/Objective
1. Make a functioning chat bot that responds to health and nutrition-related questions
2. Giving the clients valid answers along with suggestions/advices
3. Make an interesting UI to keep the client hooked

Tasks
- ☐ Decide the programming language/frameworks that will be used
- ☐ Create a basic layout for the UI (headers, question box, "send" button, and questions & answers bubble text)
- ☐ Ensure that texts are wrapped correctly and give enough space between lines/responses
- ☐ Style the UI
- ☐ Find relevant APIs (Nutrition, Health, and Exercise)
- ☐ Decide & making the chat bot logic
- ☐ Function that processes the user's input and the AI's response
- ☐ Ensure that the APIs works with the function & logic
- ☐ Connect the frontend and backend
